

# abi Converters:

**abichina** offers 2 primary converters for use with HDMI extender and switcher/selector systems.

The VGA + Stereo Audio to HDMI Converter is designed to convert PC data signals to HDMI for input to various display devices (Projectors, LCD, Plasma).

The Component + Stereo Audio (5 x RCA) to HDMI Converter enables you to output signals from older DVD, VCR and Satellite Receiver boxes to the latest display devices using converted HDMI signals.

The Converter units are powered amplifier/converter units that output a high quality signal to ensure a quality image. Signals can be extended long distances when coupled with various Extender modules also available.
