

abi Feedback: Wireless Voting System

INTERACTIVE BOARD AID / WIRELESS VOTING SYSTEM

abi FEEDBACK is a digital interactive teaching, evaluation and electronic voting system. Each student or voter has a wireless remote to transmit the response to a centralised software receiver so the data can be collected and interpreted by a PC. Each wireless remote can be uniquely identified so the data can be presented for an individual or for the group. InfraRed or RF remote options.

Functions that can be used include class teaching, demonstration, class testing, poll voting, Q & A., teaching evaluation, outcome statistics and class roll checking. The question format uses powerpoint so the layout & appearance can be designed to suit your theme.

The teacher can use the teacher remote to select between 11 various operating modes. The receiver transfers the feedback results to the PC, that displays the results within a few seconds in one of 11 different output formats including graph diagrams.

abi FEEDBACK FEATURES:

- **Eleven Teaching Modes:** Normal Test, Rush Test, Elimination, Voting Query, Voting Investigation, Grading, Ad-lib quiz, Q & A, Roll Call, Group Activities & Text evaluation.
- **Paperless:** Many educational activities can be converted to a paperless format using the Feedback system, and results can be stored electronically & quickly.
- **Eleven Report Formats:** Includes Class Previous Score List, Class Answer Detail, Student Previous Score List, Student Answer Detail, Quiz Answer Detail, Question Accuracy Statistics, Roll Call Book, Student Roll Book, and eleven report forms.
- **Strong Functionality:** The Powerpoint based & embedded-designed software has strong functions in test paper editing, courseware creation and autoplay. It can also input & output various multimedia signals, and be operated easily. The software also provides powerful statistical & search functions for report forms. After the teacher inputs parameters such as time, subject, class or student, the software will generate an accurate & comprehensive report.
- **Save Time & Effort:** The system is easy to install & operate; it automatically marks the test paper, counts & analyses the answers, & evaluates the results. It provides quick feedback on the effectiveness of a teaching program, saves marking homework & tests, and prepares statistical reports. The results can also be used in school administration for personal evaluation, data analysis & statistical comparisons.
- **Low Set Up Investment:** Only requires a PC & the feedback system. A projector does simplify its use.
- **Interactive E-Classroom:** The Feedback system changes traditional teaching methods, and involves all students in class activities.
