

abi HDMI/DVI Extender:

SIGNAL EXTENDER / HDMI or DVI

The **abi HE-003** is the latest development in a compact and budget HDMI extender. The sender & receiver modules simply plug directly into 2 devices (eg. Bluray & LCDTV) and are connected by up to 30 meters of Cat 6 cable. No power supply or HDMI cable is required.

High quality 1080P picture signal over extended distances without problems of signal drop & ghosting.

Our HDMI/DVI adaptor means the package can also be used for data transfer of 30m distance with the same benefits.

abi HE-003 FEATURES

Sender:

- Use UTP Cat 6 cable to substitute for HDMI cable to achieve long distance (30m) transmission using video format 1080P (HDMI 1.2)
- Auto adjustment of feedback, equalization & amplification.
- Signalling rates up to 1.65Gbits in support of 1080P display
- Supports one HDMI input & one RJ45 (Cat 6) output
- HDCP compliant
- HDMI V1.2 compliant
- No extra HDMI cables are needed
- HDMI/DVI adaptor included for attachment to DVI output device
- Compact size & easy to use; no settings to be made

Receiver:

- Use UTP Cat 6 cable to substitute for HDMI cable to achieve long distance (30m) transmission using video format 1080P (HDMI 1.2)
- Auto adjustment of feedback, equalization & amplification.
- Signalling rates up to 1.65Gbits in support of 1080P display
- Supports one RJ45 (Cat 6) input & one HDMI output
- HDCP compliant
- HDMI V1.2 compliant
- No extra HDMI cables are needed
- HDMI/DVI adaptor included for attachment to DVI output device
- Compact size & easy to use; plug and play

Included: Mini HDMI dongle sender unit x 1, Mini HDMI dongle receiver unit x 1, DVI/HDMI adaptor x 2, user manual

Note: Quality of the networking cable affects the transmission distance
