

abichina Keystone AV Wall Plates

AbiChina's Keystone wall plate system provides the ultimate flexibility for clients to be able to select the connectors they need. Convenient, practical & economical - a great solution!!

The limitation of the Keystone system has been the ability to include large connectors such as VGA. AbiChina has the solution with several custom plates with these connectors plus extra keystone spaces. Use these custom plates or the standard keystone plates to create the combination of connectors you require.

Keystone plates with 1, 2, 3, 4 or 6 keystones; a full range of keystone connectors plus a black keystone plate. All at great prices!!
