

abi Motor Projector Lifts

CEILING RECESSED PROJECTOR LIFTS

Motorised Scissor Projector Lifts

AT ONE TOUCH of the remote control your projector descends from its concealed ceiling recess smoothly and quietly, to its predetermined projection position.

After the show, it retracts on command, leaving a clear, uncluttered ceiling. **abi's** new unique electronic limit switch control enables the lift to be set for normal operation but it can be dropped to its full extension for servicing or lamp maintenance.

abi now offers 2 standard models to suit home and commercial applications - a new standard scissor action design model to fit within the standard joist height of most domestic ceilings and a long drop model to facilitate servicing in auditoriums.

Included with each projector lift is a ceiling closure of white powdercoated metal which will match most ceilings, and a universal projector mount, designed to suit most projectors.

For easy use, an **abi** IR remote control is also included with all models, the receiver being mounted inside the lift.

Already less expensive compared with other motorised projector lifts, the easy installation of the **abi** lifts makes them excellent value for money.

SPECIFICATIONS

Model:	BSI30	BS270
Type:	Scissor-action style; in-roller motor 110V 60Hz/240V 50Hz AC	
Material:	Powdercoated steel mount with powder coated ceiling plate.	
Dimensions (*See example pic) Closed- not including projector and ceiling closure	45x41x17cm	45x41x32cm
Ceiling Cutout:	43.5x43.5cm	43.5x43.5cm
Max Drop (adjustable):	130cm	270cm
Capacity:	20kg	20kg
Lift Weight:	25kg	30.6kg
Power	25w	30w
Included:	Powdercoated ceiling closure and cutout frame. IR Remote, projector mount.	

*Note: The angle of the projector significantly affects the overall height when packed up.

Included ceiling closure and cutout frame.

IR Remote & electronic limit switch control (Receiver inside lift)
