

abi Portable PA System with DVD

PA-9610

The intuitive user features on the new PA-9610 portable PA system, combined with the power of 60w RMS make this the perfect PA for education, clubs, churches, celebrants or outdoor venues. It has wireless and wired microphone facilities, music playback, record and mix that can be done at the same time.

The built-in DVD player is compatible with VCD, CD-G, CDR and CD, and the PA-9610 also has a built-in MP3 player with USB port to download or play music. An SD card can support memory capacity up to 1GB.

PA-9610 can be powered by mains power or battery (for 4-6 hours, depending on the functions being used). Recharging of the battery will take 7-10 hours.

The wireless microphone system includes a handheld UHF remote microphone. A headset microphone + lapel microphone, with a belt-pack transmitter, is available as an option. Operating frequency range can be manufactured to your country's requirements, with 16 selectable frequencies to avoid potential interference. Up to 3 wired mics can also be connected to the control panel. The voice audio can be given desired loudness priority relative to any background music/audio. The mic can be run to an external amplifier using the Line Out socket.
