

# abi 25W Powered Speaker with Wireless Microphone

## PIR-306

This innovative new technology speaker provides a multi-function audio solution for a standard size room, such as classroom, meeting room, training room, etc. The 25W speaker output is sufficient to enable people in a standard size room to hear.

The speaker includes the innovative InfraRed wireless microphone system for the Presenter. The system is supplied with either hand held or headset bodypack microphone as required. Mic range is 10m; a second mic and extra receivers (for larger rooms) are available. The infrared wireless system will not interfere with audio systems in adjacent rooms and cannot suffer interference from external TV, other VHF or UHF signals.

Stereo audio from PC, DVD, etc can also be input into the speaker for broadcast to the room. Additional receivers can be connected to the back of the speaker to extend reception distance; speaker controls are included for convenient use, and adjustable angle mount bracket is included.
