

abi Prado Motorised Screens

abi Prado motorised screens use only the highest quality USA grade matt white, fibreglass backed projection screen fabric, and are operated by whisper-quiet motors. High Contrast Grey fibreglass backed fabric also available for 16:9 format sizes.

All screens have black borders including a 30cm top black leader (45cm for 16:9 format), that can be adjusted which is useful in recessed ceiling or high ceiling installations. There is a safety cutout to avoid damage from incorrect limit switch adjustment.

The screen case is made of aluminium, with an attractive round face design, and finished in modern white powdercoat. The wall fixing brackets are incorporated into the back of the screen case, and can be adjusted horizontally to line up with wall studs.

All screens include a built-in remote control that can be operated by RF or IR remote control, or by 12V relay command from a control system. Installation is easy - simply plug the IEC cord provided into a power point. The plug can be removed for concealed wall fixing if preferred.

SPECIFICATIONS
