

abichina Quickfold Screens

abichina offers the latest, improved hinge lock system design in a range of specialist folding portable staging screens. The screen systems can be packed down into a travelling case for storage or transport, and erected quickly and easily by one person when required. The systems include a 32mm square aluminium frame, front and rear projection surfaces, heavy duty legs, antisway bars, & aluminium carry case. Center post (included) can be used in front projection to ensure the edges of the screen surface remain straight and do not become concave.

Our new lock is designed for ease of operation, while providing a tight and strong join, with maximum life. The result is a rigid frame with minimum movement and superior strength. It is very user friendly and incredibly easy to set up.

Surfaces included are flexible matt white for front projection and flexible translucent grey vinyl for rear projection. Standard formats are video (4:3) and widescreen (16:9) in a range of sizes, 100mm black borders are included as standard. The fabric locking pins give the best tension and surface flatness.

Antisway bars & heavy duty leg bars are included to prevent movement and for improved upright stability.

STANDARD FORMAT/SIZE SPECIFICATIONS

Product Code	Overall Size H x W	Image Area (10cm black border)	Nominal Diagonal
<i>Video Format (4:3)</i>
