

# abi RearPower

## REAR PROJECTION FILM

ABI RearPower is high resolution, offers high brightness and a wide viewing cone.

Ideal for any rear projection, and perfect in Point of Sale applications where there is high ambient light.

It is a coated screen with a highly refracted crystal micro-molecular structure - and unique in that the image is clear with high contrast, and bright on *both* sides of the screen (one side in reverse of the other).

Both standard white and high contrast grey rear surfaces are available. White recommended for high bright light & grey for controlled light.

RearPower does not show a hot spot and has even brightness, with a wide viewing cone (horizontal and vertical)

Ideal for High Resolution projection. It does not exhibit any doubling or moire effects.

## SPECIFICATIONS

**RearPower** is available as an adhesive-backed film, off the roll in 1524mm width. The film can be adhered directly to glass or acrylic surfaces.

For suspended screens, the fabric can be adhered to the correct size and format acrylic surface, and suspended for use as required.

Product Name:	<b>Standard White</b>	<b>High Contrast Grey</b>
Ordering Code:	RPFILMW	PFILMHCG
Film Thickness:	100µm	100µm
Film Width:	1524mm	1524mm
Transmittance:	92%	81%
Haze:	93%	93%
Gain:	5	4
Viewing Angle:	150°	120°
Contrast Ratio:	200:1	300:1
Hardness:	2	2

Sold in multiples of 1m length x full roll width.
