

abi Digital Presenter Desktop Series

JY-585/90B/I 30B

High resolution, capable and well priced!

With either 850,000 or 1.3 megapixel camera outputs, the **abi** desktop series offers a high quality image output with a range of add-on features to match. For budget conscious users, the JY-585 offers the same 850,000 pixel lens but with VGA output only to keep costs down. Outstanding value-for-money. Main features:

- Automatic focus
- Adjustable colour
- Adjustable brightness
- Image capture
- Image mirror
- Image freeze
- Image invert (negative/positive)
- Captured image comparison
- Text mode for display of printed material
- Variable point focus for 3D objects
- Zoom control to match image size and object size
- VGA Output to PC, projector, LCD TV/Plasma and display devices
- Video switching function - 2 x video in / 1 x video out (not available on JY-585)
