

abichina Wall Plates

AbiChina now has an extensive range of standard wall plate designs available. All use double sided push connectors for a fast and easy installation. There are a combination of plain white plastic plates and the "decora" style 2-piece plate that includes a cover panel for a more stylish appearance.

Wall plate designs are available in both the 120x72mm and 88x88mm plate systems.

In addition, Abichina can now also offer a range of wall mounting boxes to suit both size plates, to provide a cavity for cable connections where the mounting wall is solid and does not have any cavity to locate the cables.

Plate designs and connectors available suit audiovisual, PC and telephone installations. We can also manufacture custom designs to suit your special requirements.
